

GANCON 19

Department: Anaesthesiology

Category: CME

Date: June 16th 2019

Venue: Lecture Theatre

Report: Department of Anaesthesiology conducted a one-day state-level CME with theme of care for the elderly. Today 10% people world wide are aged 65 and above. Hence the importance of geriatric anaesthesia cannot be readily stressed upon. It is important for the practicing anaesthesiologist to update him/her self on the current recommendations / guidelines for the safe conduct of anaesthesia. Eminent speakers expounded on various aspects of geriatrics anaesthesia that was educational to both the consultants and the postgraduate students.
