NATIONAL LEVEL CME 2024
DEPARTMENT OF MICROBIOLOGY
IN COLLABORATION WITH MELAP

With great respect for our esteemed Chairman, Sri Gokulam Gopalan, and our distinguished institution, we are thrilled to announce the organization of a National Level CME on "Laboratory Management Systems and Internal Audit According to ISO 15189:2022" in partnership with MELAP, from Sept 3rd to Sept 6th in our Institution Lecture Theatre.

The ISO 15189:2022 is an international standard that specifies the requirements for quality and competence in medical laboratories. The medical laboratory is essential to patient care since decisions on patient treatment are made based on laboratory results. The standard provides a structure that enables these organizations to consistently develop their quality management systems (QMS) and assess their own competence.

Our 4 days onsite training programme seeks to deliver an in-depth overview of these standards, presented by a panel of esteemed experts.

With Best Regards
Dr. Ramani Bai J T
Organising Chairperson
